Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-17, 19-26 and 29 are allowed.

The following is an examiner's statement of reasons for allowance: none of the cited references teach or fairly suggest a weighting processor responsive to a decoder element which is in turn responsive to a likelihood estimator as in applicants' claims 1-17 and 19-26 or generating weighted compensation data responsive to a decoded data sequence which is in turn responsive to likelihood estimates as in applicants' claim 29

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ito *et al.* (5,867,532) shows a weighting processor (174) directly (through connection S12) responsive to a likelihood estimator (12) and Ariyoshi (2005/0086570) discloses a decoder (102₁) responsive to a likelihood estimator (101).
